From: Jay
Topic: 1 Message: 2

No, I didn't die, LOL :)

I am in the process of cleaning up the GUI and code, plus working on an
update to the recorder...
The first beta release should be out by the end of the month...

Regards,
Jay

3. Program Status Update

Yahoo group: TrunkMON
Date: 2008-01-30 22:24:49 UTC
From: Jay
Topic: 3 Message: 3

Hey All,

Just a further note on the status update.
I came down with the flu bug on the 18th and it's been kicking my butt.
The main symptoms have subsided 4 days ago, but I'm still getting dizzy
standing up too long or trying to concentrate on reading what's on the
monitor after 10 minutes or so.
I can get some work done now and then, but for the most part, it will be a
slow process catching up...
I'll keep ya updated on when it's getting close to being released...

Regards,
Jay

4. TrunkMON version 0.60.100 Now Available

Yahoo group: TrunkMON
Date: 2008-01-31 10:39:49 UTC
From: Jay
Topic: 4 Message: 4

TrunkMON version 0.60.100 Now Available for Downloading from homepage:
http://members.cox.net/crazycalifornian/TrunkMon/TrunkMon.html

Currently, TrunkMON does not control any radio or scanner.
As long as you have a Discriminator Tap, You can monitor
the Control Channel Activity for Edacs and Moto Type-2 Systems.

NOTE: Moto Type-I Support will be finished in the next major update.

Version 0.60.100 Released 01/31/2008

Regards,
Jay

5. Need Startup Help

Yahoo group: TrunkMON
Date: 2008-02-03 16:18:32 UTC
From: Ralph Korchensky
Topic: 5 Message: 5

I have been using Unitrunker for a very long time. I tried to start TrunkMON using the same connections and I just cannot get it to start at all. I have spent several hours with absolutely no signs of progress.

I imported a local EDACS system from RadioReference and it imported OK, so that tells me the com port settings are OK.

However, thats it!

I cannot get the scope to show me any indication of signal and of course nothing at all happens. There is no signs of life whatsoever.

Can some kind soul give me the "idiots version" of how to start this program?

The program looks to be about the best I have ever seen, and believe me I've tried them all.

Good luck with the development of this software.

Ralph VE3EUK

6. Re: [TrunkMON] Need Startup Help

Yahoo group: TrunkMON

From: Jay
Topic: 5 Message: 6

Hi Ralph,

For now, to start trunking, click the Power Button ON, then click the
Trunk Button to start trunking.
In the Trunk Settings (Trunk Menu->Settings), you may have to toggle the
Reverse Polarity checkbox.

For Edacs, the normal settings is 9600 Baud and use a sampling rate of
44100.
Did you also enter the frequencies with the right LCN Order in the Freq Plan
Editor?

If your Sound Card settings are correct, you should be able to monitor the
control channel.
One thing to try would be after you click the Trunk Button, is to check the
values shown in the Status Bar (Left of the time display).
If your sound card settings are correct, you should see approx 45% to 55%
1's and 100% Recovery Rate.

I see that the O'Scope isn't functioning, I'll make a change to re-enable
it so you can see the input waveform...

Regards,
Jay

Topic: 5 Message: 7

Hi Jay,

Thanks for your prompt and courteous response.

I have no idea where I was wrong but I did as you said and I am now decoding. My 1's are sitting at 46-51 and my decode rate typically sits at 100%, sometimes dropping to 98.6.

I am astonished/impressed at some of the information available from the statistics.

I think there might be quite a large learning curve, but I do have to tell you I think you are on to the beginnings of a revolutionary program. I don't impress easily, but I'm impressed!!!

I'm sure you know without being told that a help file would be most welcome.

I'm going to play for a few days with Unitrunker playing on the next screen, and I'll give you my comments in a few days.....I'm sure they will be mostly good. I just need time to become a bit more familiar.

Thanks, Ralph VE3EUK.

8. TrunkMON version 0.60.101 Now Available

TrunkMON version 0.60.101 Now Available for Downloading from homepage:
http://members.cox.net/crazycalifornian/TrunkMon/TrunkMon.html

If you encountered a crash when trying to Edit a RadioID from
the Affiliation Window, then when you run this version, you
should open the Display Settings and click "Set Radio List Font"
and Selct a Font, Click Ok, Click the Apply Button and finally
Click the "Set for ALL Radio" Button. This will RESET the Font
used for ALL Radios and fix the error...

Currently, TrunkMON does not control any radio or scanner.
As long as you have a Discriminator Tap, You can monitor
the Control Channel Activity for Edacs and Moto Type-2 Systems.

NOTE: Moto Type-I Support will be finished in the next major update.

Feb 05,2008 - Fixed: Editing RadioID from Affiliation List.
Feb 05,2008 - Fixed: Editing Fonts for RadioID's.

Version 0.60.101 Released 02/05/2008

Regards,
Jay

15. RadioReference web import freezes

Yahoo group: TrunkMON
Date: 2008-02-10 23:38:18 UTC
From: aopajustin
Topic: 15 Message: 15

I'm trying to import talkgroups from RadioReference. I get to the part where it brings up the talkgroups (268 of them) and I select them all. When I click the Import button and select Yes to the overwrite screen, it shows me the Verify TalkGroup Info with the Finish button greyed out. I figured it would take a while to import all 268 talkgroups so I let it alone for about 20 minutes. When I came back, the donate screen was up and the Web Import screen had vanished. I'm confused.

16. Re: [TrunkMON] RadioReference web import freezes

Yahoo group: TrunkMON
Date: 2008-02-11 00:30:23 UTC
From: Jay
Topic: 15 Message: 16

Hi Justin,

The reason for the Finish button being Greyed Out is because it's waiting
for you to edit the GroupID Name(s)...
The max length for a Group Name is 60 characters.
If the right side of the list shows "..." in a Group Name, then it needs
editing.
Just click on the items that need editing, edit the Name and Click the
Update Button.
Do this for All Long Names until the Finish Button is Enabled...

Regards,
Jay

Topic: 19 Message: 20

Hi Ralph,

Right now I'm working on the new RadioReference.com web import interface,
RR.com will be changing their format for public use soon, so I need to get
that out first.

I have bought 4 scanners on eBay in May-Jun and will be adding support for
scanner control for most BearCat's.
Plus, the Control Channel Activity window is getting some new additional
features added as well...

The RR Web Interface should be completed in a few more days and I should
have an update out for that sometime in the 1st week of September.

Regards,
Jay

Topic: 23 Message: 23

I noticed on the main webpage, you guys somehow set it up so that you are able to view user status. The link to that image is below:

http://members.cox.net/crazycalifornian/TrunkMon/images/UserStat.gif

How did you go about setting that up?

24. Re: [TrunkMON] setting up user status

Yahoo group: TrunkMON
Date: 2008-11-12 01:07:50 UTC
From: Jay
Topic: 23 Message: 24

If the system supports these messages, they will automatically be displayed
when seen in the data stream.

In order to Edit the specific messages ("On Call", Etc) just click the item
in the Description Column and a window will pop-up allowing you to change
it...

26. Controlling Scanners/Radios for Voice Following

Yahoo group: TrunkMON
Date: 2009-01-05 06:38:13 UTC
From: Jay
Topic: 26 Message: 26

Just a note to let you all know that I am still working on this :)

I changed my test application to use just one Main Display instead of having a different display for each radio. This way I can keep it simpler for now, then later on I can add more features such as a more in-depth system programmer and scanner coltrol.

Last night I started on the Uniden "DMA" scanner support, I have a BCT15 for that and a BCT8, BC780XLT & PRO2052 for the older Unden contol.

I thought I'd be a bit further on this project, but had other things going on too.

I'll keep you all informed of the progress in the coming weeks :)

Regards,
Jay

30. HD Crash!

Yahoo group: TrunkMON
Date: 2009-04-03 01:07:51 UTC
From: Jay
Topic: 30 Message: 30

Hey All,

My old case for my Windows95 system took a dump 2 days ago...
The power switch on the front hasn't worked in a month, so I've been unplugging the power cord in and out of the power supply to turn it on or off.
The connector for the 110V on the power supply broke apart yesterday, so I transfered the motherboard, all cards, hard drives and cd drive to an older short tower.
Today when I powered up the system, I heard a squeal which I thought was the cpu fan, but turned out to be one of the hard drives, "the important one!"...
The computer doesn't recognise any hard drives now when it's connected.

Since I've been working on updating TrunkPCR and PCR Pro on the newer PC using the PCR-2500, I have the most current code for those on the new pc. However, the code for PCR Remote and TrunkMON was on the hard drive that crashed. The code for PCR Remote is one year old on the newer pc, but the code for TrunkMON is from laste last October...

I'll have to take a look on my back-up CD's to see when I backed them up last, but I think it was a month or two ago, hopefully not too much more than that...

The bad news is that the database program that keeps track of all donations and stores all the key file data, was on that hard drive too, so I'll have to see when I backed up that on CD as well. Luckily, I still have all the emails from PayPal and users that have sent donations by check, money order or cash. The copy on the newer pc is two years old, so it isn't totally gone :)

I was hoping to release an update for TrunkPCR and PCR Pro this week, but first I'll have to back-up and restore what I can, then rebuild what was lost...

I'll yet you know when opertion is back in working order...

Regards,
Jay

I was hoping to release an update for TrunkPCR and PCR Pro this week, but first I'll have to back-up and restore what I can, then rebuild what was lost...

I'll yet you know when opertion is back in working order...

Regards,
Jay

Get frequencies from radioreference.com and program manually. Or purchase ARC300 software for GRE SPR300/400 and RS PRO-163 and cable to program from radioreference.
This is easiest way and programs digital freqs, but not protected channels such as Michigan State Police.

Larry Johnson

Sorry for the late reply mate.

Basically, when I try to select Icom from the list of receivers it tells me

No Radios Usable at This time.

I have an Icom IC-R20

Cheers

Yep, that is because the "Radio Control" code isn't finished yet...

TrunkMon currently is just a Monitor program for now, the control part will come as soon as I can add that part.
The Icom CI-V protocol control part is nearly finished, so as soon as I can finish that part, your Icom as well as other CI-V controlled radios will be usable too :)

40. Possible bug report & query on dump info

Yahoo group: TrunkMON
Date: 2010-04-14 21:56:18 UTC
From: Jason
Topic: 40 Message: 40

Hi Jay,
Just discovered your TrunkMon program after a friend recommended it from using TrunkPCR.
Great work so far...

... but I think I've got some bugs to report in the EDACS side.
Decode rate is hovering between 60-90% so I know the decode action is working OK.
The problems I've observed so far are:
Under Control tab, groups showing up when active are mis-reporting the GID. Eg: I can see three groups 1045, 1046 & 1050 on Etrunk / Uniden 396T / Unitrunker, but all three are being erroneously reported as group 1040 in TrunkMon.
Under System Info tab, neighbour sites area, only two neighbours seems to ever be reported, one of them with a site ID of 00 (impossible in EDACS)
Interestingly, the dump tab shows all the correct group assignments & site adjacencies.

I'd also like a bit of info on the dump info, specific to EDACS:
With the site ID, whats the R flag?
With an adjacent site ID, whats the Rsvd flag? (Reserved, not used yet?)
And lastly, is there an explanation for the Extended Site Options nybble?

I'll try a previous version and see if my above bugs change.
Thanks
J

Hi Jason,

Looks like that may be from some old code that was applying the "Associate GroupID's" from MOTO decoding setttings. I'll verify that this is fixed in the next release...

Yep, the "R" and "Rsvd" values are from *unused* bits of the commands. I added these just so I can see if there is any changes in these...

Regards,
Jay

42. Update Status

Yahoo group: TrunkMON
Date: 2010-04-19 21:03:35 UTC
From: Jay
Topic: 42 Message: 42

Hey All,

For the past two weeks I have been working on adding support to Control & Program the BearCat Scanners (Finally!!!)...

The Following Models will be supported in the next release:
PRO2052, BC245XLT, BC250D, BC296D, BC780XLT, BC785D, BC895XLT, BC898T, BCT8 & BC796D.
Plus:
BC246T, BCD396T, BCD396XT, BCD996T, BCD996XT, BCT15, BCT15X, BR330T & BC346XT...

I'm guessing that I'll have an Alpha test in the next 30 to 45 days and a public release in about 60 days :-)

AOR AR5000, IC-R8500 and other CI-V Protocol Based Radios/Scanners support is being added too and might be ready by July?

Jay

Update on the Update...

Running a little behind again, but definately making progress :-)
For the Trunk Tracker I, II & III models I have the basic I/O working, but no Programming Interface designed yet...
For the Trunk Tracker IV (DMA) models, I have all 90 commands working when reading the data, but only have a few tested as far as writing to a scanner. The Programming Interface is working as far as displaying what has been read from a scanner, Editing the settings are about 50% done...

So maybe in a few more weeks I'll be able to let some start testing it :-)

Regards,
Jay

Hi Barrie,

TrunkMON is currently just a monitor...
It will have support for BearCat Scanners and a few other radios just as soon as I can wrap that part up. These support routines are about 90% complete, but I need to finish up the GUI Editor before I can release it...

For the IC-R1500, you can use TrunkPCR...
http://members.cox.net/fiftyone.50/TrunkPcr/TrunkPcrDwnld.html

Hi Vincent,

I've been working on TrunkMON now and then when I'm not updating my other programs, Hopefully I'll have something new by this summer?

Currently TrunkMON has all of the code in place to support the control of multiple radios/scanners. I have two modules for the Bearcats and one module for the AR5000 and another module for the R71 that aren't finished yet, which is the only thing holding this up...

Regards,
Jay

There are two other buttons above the [Trunk] Button, [Control] and [Dump].
Dump lets you watch the decoded data in real time and Control let's you
watch the Control Channel Activity.

After the Control Channel window opens, you can click the Tabs to see more
info...

The 1's is an average of the binary databits decoded, databits are either 0 or 1...
The 100% means that the decoder is processing all incomming data without errors :)

Hi Jim,

From the Trunk Menu, Click Settings, then click the [Sound Card Settings] Button.
Then select your Sound Card in the Decoding Device and click the [Accept] Button.

In the Trunk Settings, be sure you have the Moto System selected and click the [Custom] Button. You can now click Trunk Menu -> Edit Freq Plan and enter the known values there...

If you have everything set correct, click the Power Button...

(This is a repeat of what I sent you)

Another question Jay, Can you convert the .xml files to a form you can use in a database or spreadsheet program?
regards,
Jim

68. TrunkMon G & I (Group & Individual) calls monitoring help

Yahoo group: TrunkMON
Date: 2012-11-20 22:16:09 UTC
From: deccomputers50@ymail.com
Topic: 68 Message: 68

Hi!

I was pondering about how to listen to individual calls. I own a MaxTrac C6. Most calls are on "Group" channels. I can program my radio to these to listen too. The problem is, how can I configure the MaxTrac to listen to "Individual" calls? Is this something you can advise me about, or is it better off on a Motorola forum?

Thanks, Tony.

I believe it is known as "Private Conversation". This is so others don't get distracted on a group channel, or for ones ears only.

Thanks for the great software too, by the way. I have been having a lot of fun!

Tony.

The homepage has been moved here:
"http://www.fiftyonefiftysystems.com/TrunkMon/TrunkMon.html"

And I've updated the link in the group :)

Regards,
Jay

Topic: 79 Message: 79

There has been some confusion regarding Donations and the Use of Key Files, this document should clarify a few things.

The Total Donation Amount a User Sends determines how many Key Files they will Receive.
A Total Donation of $10 to $30 entitles the User to Receive Three (3) Key Files.
A Total Donation of $40 entitles the User to Receive Four (4) Key Files.
A Total Donation of $50 entitles the User to Receive Five (5) Key Files.

The Total Donation Amount accumulates for Any Donation Made for My Programs.

I Allow Three (3) Key File Updates within a 6 Month Period.

Key Files are issued to a User for Their Personal PC's or Work PC's, NOT a Friend's PC.

A Single Key File will ONLY Work on ONE (1) PC, NOT Multiple PC's...

Key Files Are NOT Transferable...

Jay L. Bray
